Fitch Ratings 'A' (Strong) with a Stable Outlook.

A.M. Best 'A-' (Excellent) with a Stable Outlook.

OUR VISION

To be a strategic enabler of growth and development for the insurance and takaful industry through quality, reliable and efficient services.

INTRODUCTION

The ISM Statistical Yearbook is an annual publication that is much anticipated by Insurance Companies and Takaful Operators in Malaysia. This publication now in its twentieth edition represents the industry statistics as at Financial Year End of 2024. Based on audited financial figures, the publication provides comprehensive data on the financial performance of the Malaysian insurance and takaful industry. This information is useful for a better understanding of the Malaysian insurance and takaful landscape as well as trends in particular areas of business, including analytical view of past year’s performance and industrial growth.

Publication of the ISM Statistical Yearbook would not have been possible without extensive co-operation between numerous parties. ISM acknowledges the efforts of all Insurance Companies and Takaful Operators in providing data for the publication. We would also like to extend our utmost gratitude to Malaysian Reinsurance Berhad for sponsoring this year’s Statistical Yearbook as well as to Fitch Ratings for contributing the overview of the industry's economic prospects.

MALAYSIAN CREDIT & ECONOMIC OUTLOOK

Malaysia's ratings are supported by strong and broad-based medium-term growth, driven by robust domestic and foreign investments, and persistent current account surpluses with a diversified export base. These strengths are balanced against high public debt, a low revenue base relative to current expenditure, and weaker external liquidity relative to peers.

Broad-Based Growth

Malaysia's economy expanded by 5.1% in 2024, and expected to slow to 4.5% in 2025 and 4.3% in 2026. Steady labor market conditions and an income boost from pay hikes for civil servants in December 2024 and January 2026 should support household spending, with growth further underpinned by investments from government-linked companies and foreign investment related to supply-chain diversification. However, while Malaysia's export performance has benefited from the global tech upcycle in 2024, we expect momentum to slow in 2025 due to weaker external demand. Growth prospects also face downside risks from an escalation in geopolitical tensions.

Fiscal Deficit Narrowing

The 2025 budget projects the federal government deficit to narrow to 3.8% of GDP, from 4.1% in 2024. We expect 2025 federal government revenue/GDP to remain steady from our 2024 estimate of 16.5%. New budget measures, including a tax on individual dividend income and enhanced sales and service tax will bring limited additional revenue, and will be partly offset by lower petroleum-related revenue (18% of total revenue projected for 2025), given Fitch's assumption that Brent oil price will average USD70/bbl, against our estimate of USD80/bbl in 2024.

The national oil company, Petroliaam Nasional Berhad (PETRONAS) (BBB+/Stable), is negotiating with state-owned Petroleum Sarawak Berhad over control of natural gas distribution business in the state of Sarawak. Final arrangements are pending and could affect PETRONAS' s profitability and capacity to contribute to federal government revenue, including paying dividend, which will add around 1.5% of GDP in 2025.

Phased Subsidy Rationalization

The government aims to extend subsidy rationalization to RON95 petroleum, education and healthcare, following savings from cutting electricity subsidies and targeted diesel subsidies. This will reduce spending on subsidies, but a large share of the savings will be channeled to additional spending, including increased social assistance for lower-income groups. The government is also undertaking a review on civil service remuneration, with a pay hike already implemented in December 2024 and the second phase scheduled to take effect in January 2026.

Gradual Medium-Term Consolidation

We forecast the federal government deficit to decline to 3.5% of GDP in 2026, driven by continued subsidy rationalization and modest tax increases. The government aims to reduce the deficit to below 3% in the medium term, as outlined by the Public Finance and Fiscal Responsibility Act 2023 (PFFRA). We view this as a credible, gradual fiscal consolidation path.

Government Debt to Decline

We project general government debt/GDP will decrease to 75% by 2026, from 77% in 2023, but this will still be above our median 'BBB' category sovereign forecast of 59%. Our debt figures include committed guarantees, which were about 12% of GDP at end-June 2024 and represent 56.7% of total outstanding financial guarantees (according to the definition under the PFFRA). The government aims to reduce federal government debt, which stood at around 63% of GDP at end-June 2024, to below 60% of GDP under the PFFRA in the medium term.

Upside Risk to Inflation

We expect inflation to reach 2.5% in 2025, from 1.8% in 2024. The impact of diesel subsidy rationalization has been muted in 2024, due to its small CPI weight and targeted approach. The government's handling of petroleum subsidies in 2H25 will likely mirror the approach, despite our expectation of stronger pass-through from the petroleum subsidy adjustments. Upside risks to inflation include the uncertain subsidy rationalization, potential wage-inflation spirals from wage hikes and global market volatility. The policy rate is likely to stay at 3.0% throughout 2025.

Current Account Surplus; Strong FDI

Malaysia has recorded current account surpluses for nearly three decades. The current account registered a higher surplus of 1.7% of GDP in 2024, due to large import bills for intermediate goods and capital investments. Malaysia's diversified exports and competitive manufacturing sector position it well to benefit from shifts in global supply chains. Approved foreign investments rose by 18% year-on-year in 1H24, indicating increased foreign investment to realize for 2025.

External Liquidity Relatively Weak

External finances are supported by a low share of foreign-currency debt, at about 2% of total government debt. Exposure to foreign financing risk mainly arises from high short-term debt, at more than 25% of GDP, although a large portion is in stable intra-group borrowings. Non-resident holdings of domestic government bonds are high, at 21.2% in 2024Q4, but stable, reflecting a deep domestic bond market. Liquid external assets were around 88% of liquid external liabilities, below the 2023 'BBB' median of 128%.

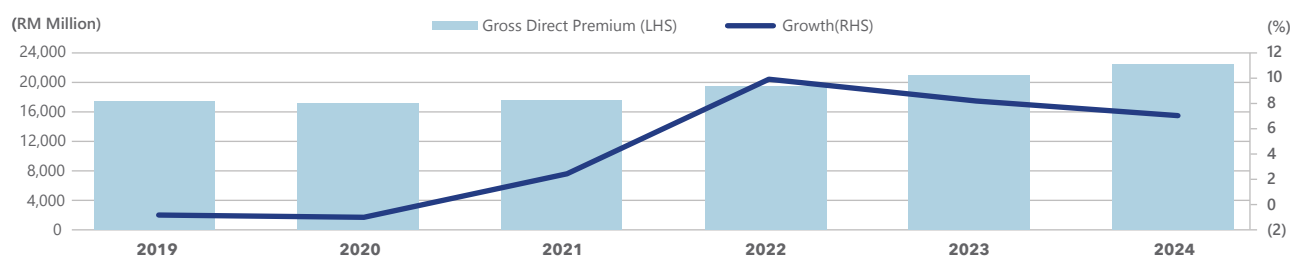

ESG - Governance

Malaysia has an ESG Relevance Score of '5[+]' for both Political Stability and Rights and Rule of Law, Institutional and Regulatory Quality and Control of Corruption. This reflects the high weight World Bank Governance Indicators (WBGIs) have in our proprietary Sovereign Rating Model. Malaysia's medium WBGIs ranking of 64 reflects a recent record of peaceful political transitions, moderate rights for participation in the political process, moderate institutional capacity, established rule of law and a moderate level of corruption, despite some high-level cases in the past decade.

GENERAL INSURANCE

Malaysia's general insurance sector continues to expand, with a record RM22.5 billion in gross direct premiums as at end-2024. This represents a 7.1% growth rate, but slower from 8.2% in 2023, driven by the slowing main motor business, which expanded by 6.7% in 2024 and 8.6% in 2023. Moreover, the growth of fire business slowed to 6.5% in 2024, from 9.2% in 2023. Meanwhile, the marine, aviation and transit (MAT) segment increased by 13.3% and personal accident by 14.1%. Medical and health showed stable growth of 10.0%, while growth in the miscellaneous segment slowed, rising by only 2.4%, compared with 19% in 2023, due to shrinkage in the contractors all risk and engineering segment.

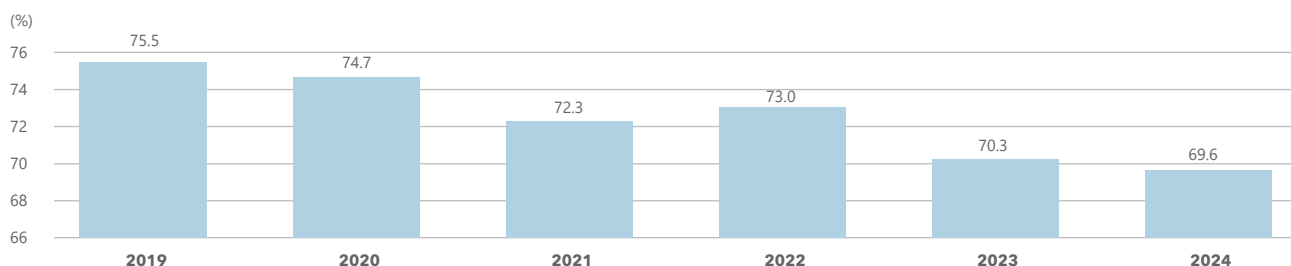

GENERAL INSURANCE: GROSS DIRECT PREMIUM AND GROWTH

Source: ISM

Risk retention continued to decline to 69.6% in 2024, from 70.3% in 2023, driven by slightly lower retention in the main motor segment (92.6%) and fire (46.6%).

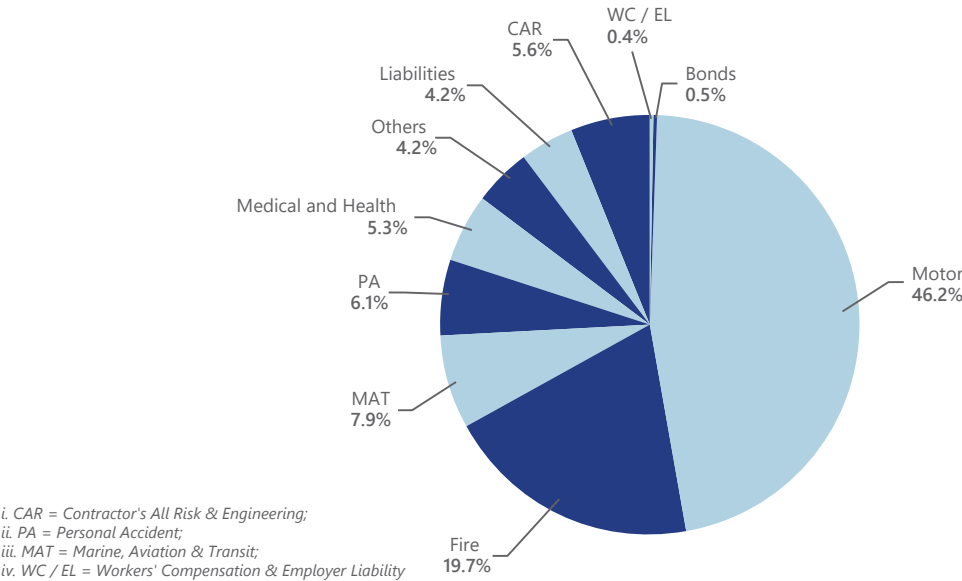

GENERAL INSURANCE: RETENTION RATIO

Source: ISM

The motor insurance sector maintained its dominance in 2024, contributing 46.2% to general insurance gross direct premiums. This was followed by fire, which added 19.7%, and MAT, at 7.9%. The contribution from the motor, fire, personal accident and medical and health segments was steady, while the contribution from MAT rose to 7.9%, from 7.4% in 2023, and the contribution from miscellaneous segments dropped to 14.8%, from 15.5%.

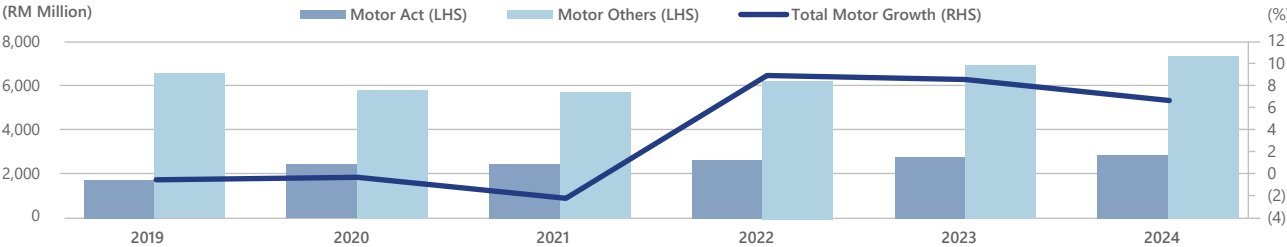

BREAKDOWN OF GENERAL INSURANCE'S GROSS DIRECT PREMIUMS IN 2024

Source: ISM

The total motor segment’s gross direct premiums increased by 6.7% in 2024, fueled by a 2.1% uptick in domestic car sales, particularly passenger and battery-electric vehicles, as reported by the Malaysian Automotive Association¹. Higher premium prices and vehicle costs also contributed to the upward trend in gross direct premiums. Compulsory insurance coverage to address legal liability causing death or bodily injury to third parties comprised 28% of total motor segment gross direct premiums, with the remainder coming from third party and comprehensive coverage.

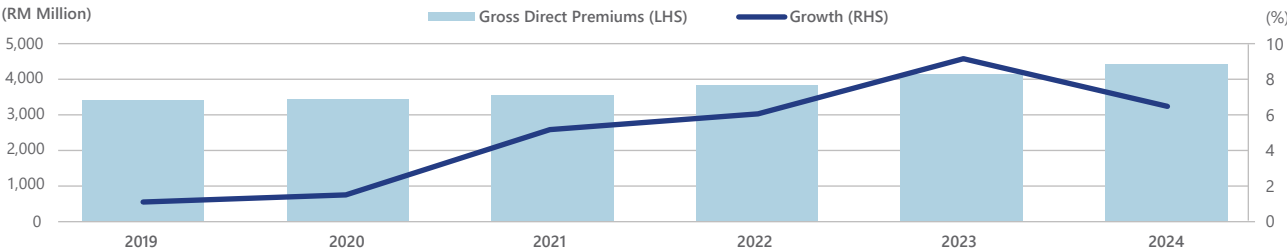

MOTOR INSURANCE: GROSS DIRECT PREMIUMS AND GROWTH

Source: ISM

Gross direct premiums from the fire segment slowed, with 6.5% growth, from 9.2% in 2023 alongside tariff liberalization. The contribution to gross direct premiums remained steady.

FIRE INSURANCE: GROSS DIRECT PREMIUMS AND GROWTH

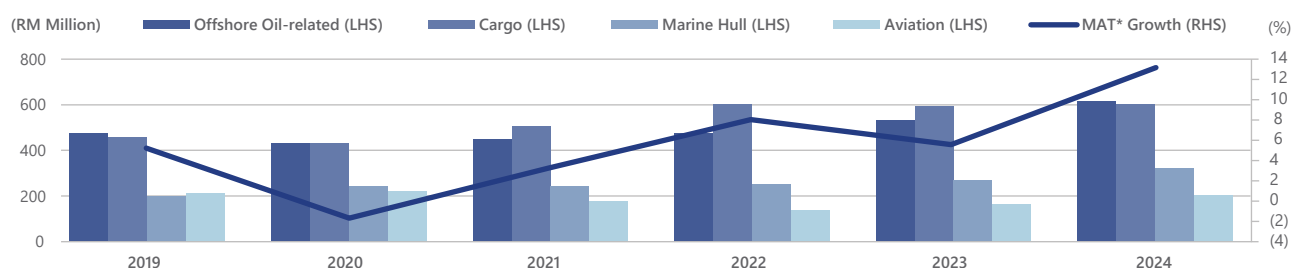

Source: ISM

¹ Persatuan Automotif Malaysia (MAA), (2025, January 21). Press Release. "Market Review for 2024"

Gross direct premiums in the MAT business increased by 13.3% in 2024. Most of the risk in the MAT segment is ceded abroad, given the limited domestic reinsurance capacity to cover the complex risks.

MAT* INSURANCE: GROSS DIRECT PREMIUMS AND GROWTH

UNDERWRITING PERFORMANCE

The general insurance combined ratio increased to 93.4% in 2024, from 92.1% in 2023, due to a rise in the loss ratio to 57.6%, from 56.7%. This mainly stemmed from a higher loss ratio in the motor, medical and health and MAT segments. Motor's loss ratio climbed to 68.6%, from 66.7%, nearing the pre Covid-19 pandemic level of 70.1% set in 2019, as the easing of pandemic-related lockdowns led to more traffic accidents and a higher frequency of claims. Meanwhile, the loss ratio in the medical and health increased to 68.3%, from 65.9% on the high medical costs while MAT segment increased to 36.6%, from 26.6%, consistent with the fluctuations observed over the past five years.

Commission costs slightly declined to 10.4% in 2024, from 10.9% in 2023, while management expenses rose to 25.3%, from 24.6%. The expense ratio increased slightly to 35.7%, from 35.4%.

GENERAL INSURANCE: UNDERWRITING PERFORMANCE

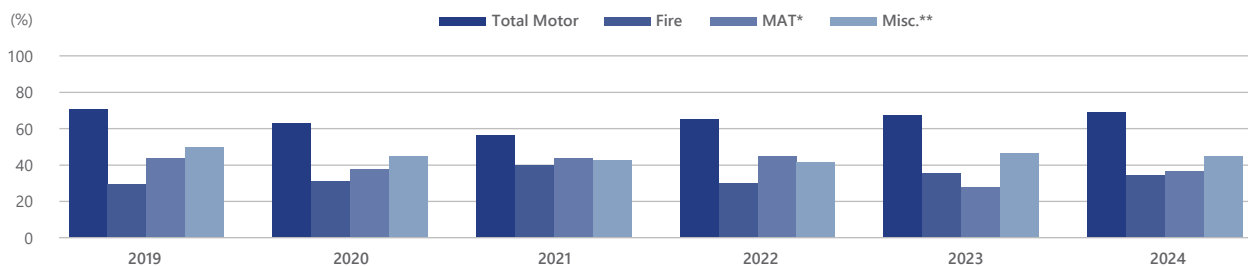

Expense Ratio is based on net earned premium

Source: ISM

The underwriting profitability of the fire segment shows a slight improvement, as the combined ratio fell to 68.2% in 2024, from 69.5% in 2023. The improvement was supported by a lower loss ratio of 34.1%, from 35.4%.

The loss ratio of the miscellaneous segment also improved to 44.9%, from 46.4%.

GENERAL INSURANCE: LOSS RATIO BY MAJOR CLASS OF BUSINESS

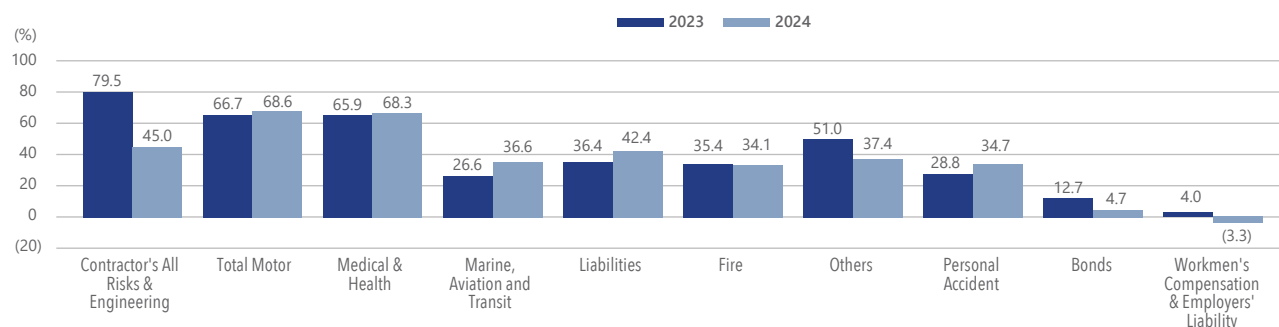

* MAT = Marine, Aviation and Transit

** Misc. = Bonds, Contractor's All Risks & Engineering, Liabilities, Medical & Health, Personal Accident, Workmen's Compensation and Employers' Liability, Others

Source: ISM

The loss ratio of the medical and health segment rose to 68.3% in 2024, from 65.9% in 2023, driven by a 15.0% surge in Malaysia's medical cost inflation, according to BNM². This surge was attributed to rising medical treatment costs, advancements in medical technology and the rising prevalence of non-communicable diseases.

GENERAL TAKAFUL

Growth in gross direct contributions in the general takaful segment has been slowing since 2023. Contributions rose by 8.4% in 2024, compared with 17.4% in 2023. This was slightly above the 7.1% growth in the general insurance industry. The general takaful segment's gross direct contributions totaled RM5.9 billion in 2024, mainly sourced from motor contributions, followed by fire and personal accident.

GENERAL TAKAFUL: GROSS DIRECT CONTRIBUTIONS AND GROWTH

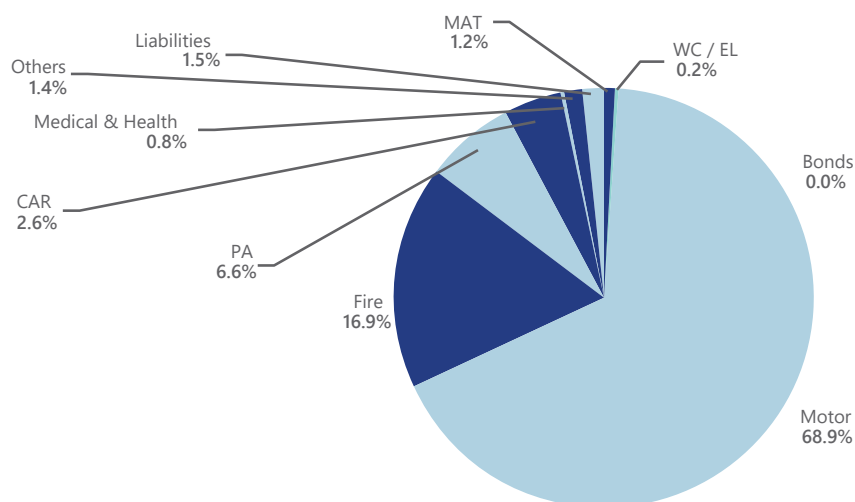

Source: ISM

² Bank Negara Malaysia (BNM). (2024 December 20). Embargo. "Interim measures to assist policyholders and to promote continued access to suitable medical and health insurance/takaful products"

General takaful maintained its domestic insurance market share, at 20.8% of total gross direct premiums and contributions, mostly unchanged from 20.6% in 2023. We expect the segment to maintain steady growth, bolstered by regulatory measures aimed at strengthening the general takaful ecosystem in light of Malaysia's position as the world's third-largest takaful market.

Motor is the leading contributor to the general takaful industry, accounting for 68.9% of total gross direct contributions in 2024, up from 66.9% in 2023. The general takaful sector's growth has slowed along with growth of the motor-segment, which stood at 11.6% in 2024, down from 18.7% in 2023. This reflected a decrease in car sales, which were up by only 2.1%, compared with 11.0% in 2023. Fire was the second-largest contributor to the general takaful industry, with a steady 16.9% share of total gross direct contributions, followed by personal accident, which accounted for 6.6%.

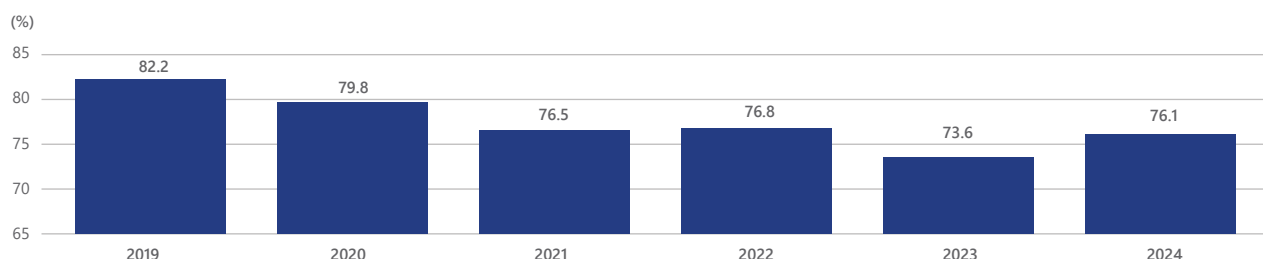

BREAKDOWN OF GENERAL TAKAFUL'S GROSS DIRECT CONTRIBUTIONS IN 2024

Source: ISM

Risk retention in general takaful increased to 76.1% in 2024, from 73.6% in 2023, driven by the higher share of the motor segment, with takaful operators generally retaining most of the risk. Takaful operators retained more risk in the fire segment for 2024, at 56.5%, from 53.6% in 2023, as rising reinsurance costs prompted takaful operators to retain a greater share of risk.

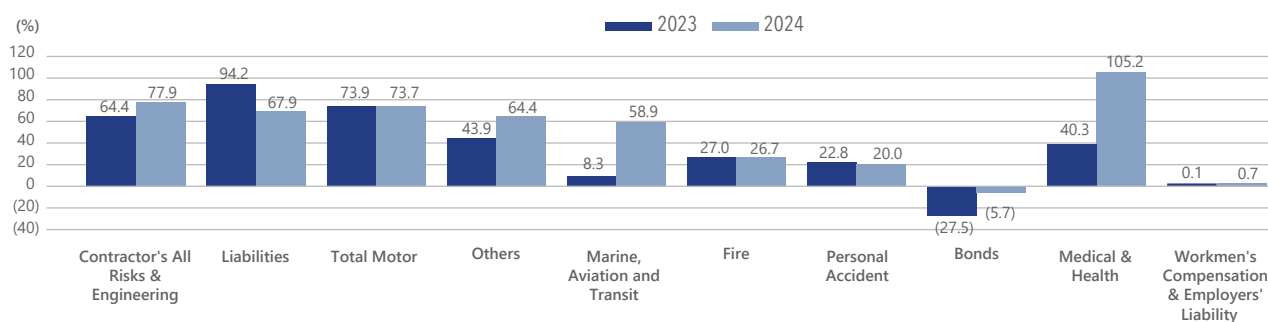

GENERAL TAKAFUL: RETENTION RATIO

Source: ISM

General takaful's loss ratio slightly deteriorated to 64.0% in 2024, from 63.2% in 2023, due to higher losses in CAR, MAT, others and medical and health. Meanwhile, the loss ratios of general takaful's major segments, including motor and fire, remained steady.

GENERAL TAKAFUL: LOSS RATIO BY CLASS OF BUSINESS

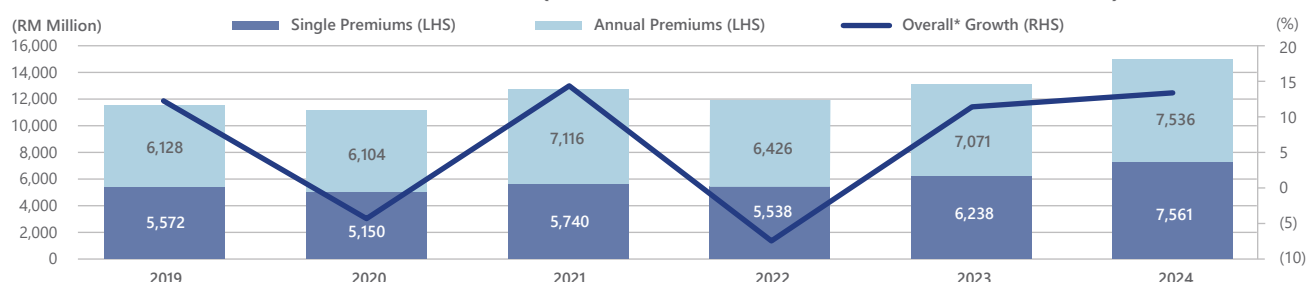

Source: ISM

LIFE INSURANCE

Malaysia's life insurance premiums continued to rise in 2024, inching up by 13.4%, against 11.2% in 2023, driven by double-digit growth in single-premium plans. Single premium plans rose by 21.2% to RM7.6 billion to account for 50.1% of total life industry new business premiums. The rest of the market comprised annual premium plans, which increased by 6.6%.

LIFE INSURANCE : NEW BUSINESS GROWTH (SINGLE PREMIUMS VERSUS ANNUAL PREMIUMS)

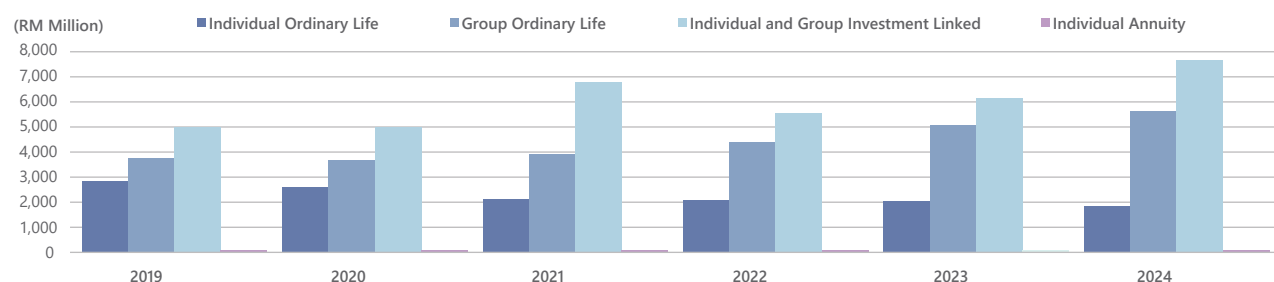

*Overall=Single and Annual Premiums

Source: ISM

Investment-linked plans dominate the life market, at 50.4% of total new business premiums in 2024, up from 46.3% in 2023, after increasing to RM7.6 billion. This growth was influenced by a shift in consumer preferences away from participating life policies, which saw a declining share of net premiums in the life and family takaful sectors, according to Malaysia's central bank³. The share of participating life policies, based on average new business premium in both life and family takaful sector over 2016-2023, have declined to 19%, from 39% in average for 2005-2015, according to BNM.

The group ordinary life segment made up 37.2% of Malaysia's life insurance market, followed by individual ordinary life at 12.4%. Group ordinary life insurance increased by 11.1% to reach RM5.6 billion in 2024, while individual ordinary life slowed by 10.8% to RM1.9 billion.

LIFE INSURANCE: NEW BUSINESS GROWTH BY MAJOR PLANS

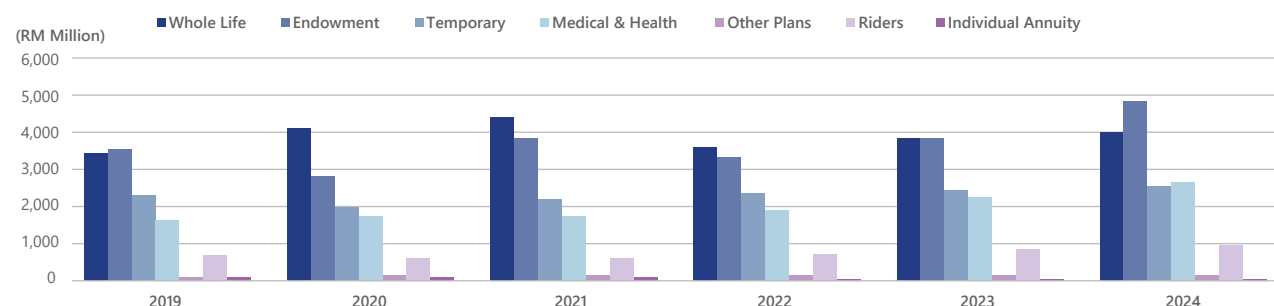

Source: ISM

Whole life plans saw a notable increase in new business premiums, which reached 32.1% in 2024, from 28.8% in 2023, on rising demand for life protection. This followed 26.4% growth to RM4.8 billion. Endowment plans become the second-largest contributor to new business premiums, despite the segment's share dropping to 26.6%, from 28.8% in 2023, with slowing growth of 5%, from 6.4% in 2023.

Accordingly, medical and health insurance became the third-largest contributor, with a 17.4% share in new business premiums, followed by temporary plans with a 16.7% share. Medical and health continued its double-digit growth of 16.2% in 2024, from 20.3% in 2023. Temporary plans also experienced some growth, at 4.8%, from 2.1% in 2023.

LIFE INSURANCE: NEW BUSINESS GROWTH BY KEY PRODUCTS

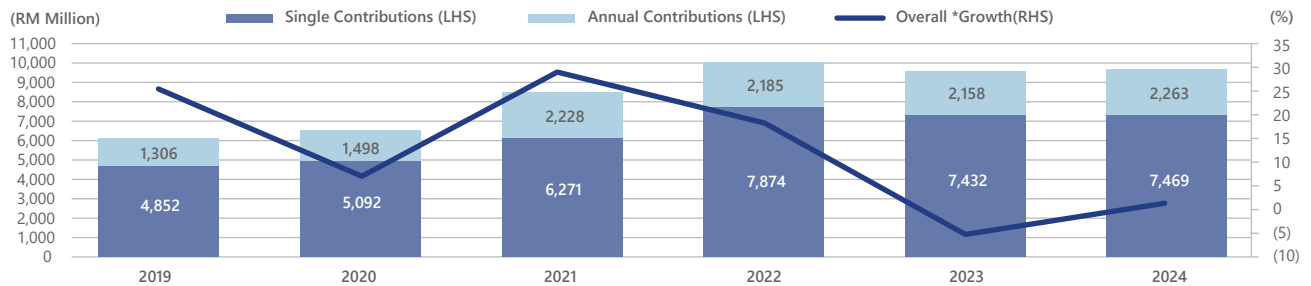

Source: ISM

³ Bank Negara Malaysia (BNM). "Financial Stability Review First Half 2024"

FAMILY TAKAFUL

The family takaful segment exhibited a positive trend in 2024, with contributions rising by 1.5% to reach RM9.7 billion, after a decline of 4.7% in 2023. This was supported by a 4.9% increase in annual contribution plans, while single contributions only increased by 0.5%.

FAMILY TAKAFUL: NEW BUSINESS GROWTH (SINGLE CONTRIBUTIONS VERSUS ANNUAL CONTRIBUTIONS)

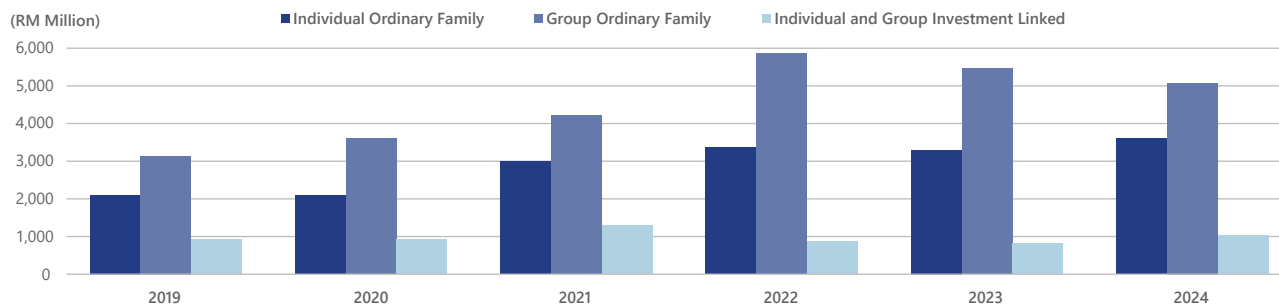

*Overall=Single and Annual Contributions

Source: ISM

The group ordinary family plan accounted for the largest share of new business contributions in 2024, at 52.4%, followed by the individual ordinary family plan of 37.1% and investment-linked plans at 10.5%. However, contributions from the group ordinary family plan continued to decline, dropping by 6.9%, compared to a 6.4% decrease in 2023. Conversely, investment-linked and individual ordinary family plans showed a positive trend, with growth rates of 25.8% and 9.5%, respectively, reversing declines of 5.3% and 1.5% in 2023.

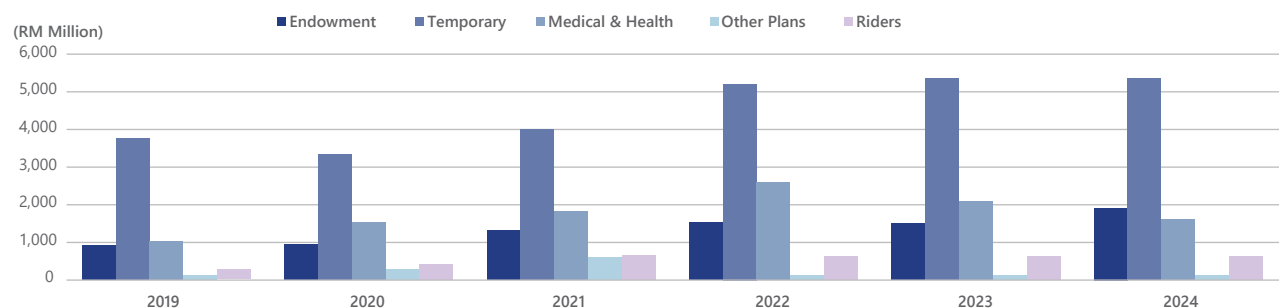

FAMILY TAKAFUL: NEW BUSINESS GROWTH BY MAJOR PLANS

Source: ISM

The temporary plan contributed the largest share of new business, at 58.1%, followed by endowment plans at 19.1%, medical and health at 15.9%, riders at 6.4% and other plans at 0.4%. New business contributions from medical and health plans declined by 26.3% in 2024, following a 20.2% decrease in 2023. Contributions from other plans also fell by 13.5%.

Stable Macroeconomic Conditions to Support Sector

Fitch expects macroeconomic conditions to remain supportive of Malaysia's insurance sector. While Fitch forecasts GDP growth to slow, steady inflation should buoy demand and keep insurers' costs in check, although uncertainty around subsidy rationalization could weaken purchasing power.

Low Non-Life Premium Growth

Fitch expects low growth in non-life premiums, especially for insurance and takaful operators with heavy exposure to the motor business amid increasingly competitive market conditions. Malaysia's vehicle sales are set to moderate by 4.5% in 2025, according to the Malaysian Automotive Association⁴, after several years of rapid growth. Motor insurance accounted for 46.2% of non-life premiums and 68.9% of general takaful contributions in 2024.

Tariff Liberalization

All general insurers and takaful operators met the requirement to transition to Phase 2A of Malaysia's motor and fire liberalization tariff as of June 2024, as per BNM's Financial Stability Review First Half 2024⁵.

The government subsequently implemented Phase 2B of the motor liberalization tariff in July 2023, which permits insurance pricing adjustments of up to 20%. This followed Phase 2A, which allowed pricing adjustments of up to 15%, from 10% under Phase 2. Pricing is to be influenced by driver behavior, with potential premium reductions or hikes based on conduct. Fitch expects insurers and takaful operators to invest in the necessary technology to support underwriting under Phase 2B.

Concurrently, Phase 2B of the fire liberalization tariff restricts price reductions to 30%. Fitch expects the rising cost of reinsurance and retakaful, coupled with limited underwriting capacity for rising risk, to present ongoing challenges and complicate risk-management strategies. This is particularly so for the takaful sector, which faces additional hurdles due to the shifting risk appetites of overseas retakaful providers that may not align with the needs of domestic operators.

These challenges are exacerbated by climate change, which poses an increasing threat to Malaysian insurers. Severe floods in recent years have caused widespread disruption and financial losses, with insurers striving to balance these rising costs against the ongoing tariff liberalization, which may affect premium levels.

Rising Costs Challenge Medical Insurance Profitability

The profitability of medical insurance is under pressure from rising costs, as the regulator caps premium increases. Malaysia's medical claims inflation stayed at 15% in 2024, matching the rate in 2023, according to Aon⁶. This was driven by rising medical treatment costs, advancements in healthcare technology and the increased use of healthcare services, leading insurers to propose premium hikes of 40%-70% for 2025.

In response, the government implemented interim measures to allow insurers and takaful operators to spread premium adjustments over a minimum of three years ending 2026. However, the premium increases were capped at 10% over a year and 30% in total by the end of the three-year period. Policyholders who surrendered policies in 2024 can request reinstatement with adjusted premiums. Insurers and takaful operators will also offer alternative products at the same or lower premium to policyholders unwilling to have their plans repriced, with these alternatives available by end-2025. In addition, a co-payment option was introduced for all medical plans starting September 2024.

Robust Growth in Investment Linked Plans

Fitch expects strong demand for investment-linked plans to support the overall growth of the life insurance market. Demand is influenced by declining participating life insurance, which is less flexible than investment-linked plans. A Malaysia central bank survey of 11 domestic life insurers that write participating policies, conducted in April 2024, noted a shift away from participating policies towards more flexible investment-linked plans and non-participating policies, reflecting heightened awareness of the need for financial protection.

Enhancing Underwriting and Claims Efficiency Through Technology

Fitch expects digitization and technological innovation to improve underwriting and risk analysis for Malaysia's insurers and takaful operators. Industry participants can also enhance their competitive positions. These will require investing in artificial intelligence and machine learning related technologies.

Regulatory guidance was introduced in mid-2024 to advance claims settlement practices, with the regulator promoting the wider adoption of digital technology across the industry. This includes the deployment of end-to-end digital motor-claim systems, designed to streamline the claims process and minimise errors. Moreover, digital insurers and takaful operators are setting benchmarks for traditional participants by showcasing innovative approaches to better serve evolving customer expectations.

⁶ Aon, "2025 Global Medical Trend Rates Report"

Regulatory Advancements in Risk Management and Resilience

All domestic insurers and takaful operators adopted Malaysia Financial Reporting Standard (MFRS) 17, equivalent to IFRS 17, from 2023. In June 2024, the central bank proposed revisions to the risk-based capital framework, known as RBC2, to align with global standards, with implementation set for 1 January 2027. Changes include adjustments to the Malaysia ringgit risk-free yield curve, reserve requirements, supervisory solvency levels and capital-risk charges for catastrophe risk. The initiatives aim to ensure insurers and takaful operators maintain capital adequacy levels that match their risk profiles. Fitch expect the measures to improve risk management and bolster the sector's financial resilience.

In addition, effective January 2025, the central bank issued a policy on *hajah* (need) and *darurah* (dire necessity) for Islamic financial institutions, including takaful. The policy clarifies when takaful operators can use conventional reinsurance due to certain difficulties, such as insufficient retakaful capacity or expertise to fully absorb risks or when such risks could threaten the stability of takaful funds.

Climate Risk Stress Testing

Insurers and takaful operators are required to submit the results of climate risk stress testing to the central bank by end-June 2025 for cohort 1 or by the end of the year for cohort 2. Participants are required to assess the impact of flood risk on properties and motor vehicles within insurance and takaful portfolios. The regulator is also encouraging participants to evaluate the impact on contractors' all risk and engineering segments. Fitch believes the testing will enhance risk mitigation on climate exposures.

ABOUT FITCH RATINGS

Fitch Ratings is a global rating agency committed to providing value beyond the rating through independent and prospective credit opinions, research and data. Offering a world of knowledge and experience behind every opinion, we transform information to deliver meaning and utility to investors, issuers and other market participants.

Our global expertise draws on local market knowledge and spans the fixed-income universe. The additional context, perspective and insight we provide help investors make important credit judgments with confidence.

Our credit ratings, research, financial data and analytical tools are distributed by Fitch Solutions through a variety of platforms. In addition to offering proprietary content, Fitch Solutions also provides a wide range of products as well as professional development services to the global financial community.

Dual-headquartered in New York and London, Fitch Ratings has over 50 offices world-wide. Both Fitch Ratings and Fitch Solutions are part of the Fitch Group, a jointly owned subsidiary of Fimalac, S.A. and Hearst Corporation.

As a global credit rating agency, Fitch Ratings gauges the ability of entities and instruments to meet their credit obligations. Investors and financial market participants rely on multiple sources, and the credit rating—indicating how an issue or transaction is likely to perform over time—is one of their key inputs. In this way, we help investors map potential credit risks.

Drawing on the insight of over a thousand analysts, we bring diverse viewpoints together to render objective and forward-looking assessments. What goes into and stands behind that analysis is a world of capability and expertise that spans the world's fixed-income markets.

Note:

1. The figures for 2023 (as stated in the "Previous Year" column) have been consolidated under the acquiring company for the following ITOs:

- i. MPI Generali Insurans Berhad into Generali Insurance Malaysia Berhad (Generali).
- ii. AmGeneral Insurance Berhad (AmGen) into Liberty General Insurance Berhad (Liberty).

It is to be noted that AmGen's FYE was 31 March, whereas Liberty's FYE is 31 December.

* Management Expenses from Revenue Account (Excluding Bad & Doubtful Debts)

Note:

1. The figures for 2023 (as stated in the "Previous Year" column) have been consolidated under the acquiring company for the following ITOs:
 - i. MPI Generali Insurans Berhad into Generali Insurance Malaysia Berhad (Generali).
 - ii. AmGeneral Insurance Berhad (AmGen) into Liberty General Insurance Berhad (Liberty).

It is to be noted that AmGen's FYE was 31 March, whereas Liberty's FYE is 31 December.

APPENDIX

Appended below are the formulas used in the preparation of the General Insurance and General Takaful segments of this Statistical Yearbook.

MEASURE	FORMULA
1 Net Claims Incurred Ratio	$[\text{Net Claims Incurred} / \text{Net Earned Premiums (or Contributions)}] \times 100\%$
2 Net Commissions Ratio	$[\text{Net Commissions} / \text{Net Earned Premiums (or Contributions)}] \times 100\%$
3 Management Expenses Ratio	$[\text{Management Expenses} / \text{Net Earned Premiums (or Contributions)}] \times 100\%$
4 Underwriting Profit / Loss	$\text{Net Earned Premiums (or Contributions)} - \text{Net Claims Incurred} - \text{Net Commissions} - \text{Management Expenses}$
5 Operating Profit / Loss	$\text{Underwriting Profit or Loss} + \text{Net Investment Income} + \text{Miscellaneous Income} - \text{Miscellaneous Expenses}$
6 Operating Margin	$[\text{Operating Profit or Loss} / \text{Net Earned Premiums (or Contributions)}] \times 100\%$
7 Combined Ratio	$[(\text{Net Commissions} + \text{Net Claims Incurred} + \text{Management Expenses}) / \text{Net Earned Premiums (or Contributions)}] \times 100\%$

Appended below are the definitions of terms used in the preparation of the Life Insurance and Family Takaful segments of this Statistical Yearbook.

TERM	DEFINITION
1 Insurance (or Takaful) Fund And Reserves	Includes Insurance (or Takaful) and Investment-Linked Fund at the end of the year
2 Net Premiums (or Contributions)	Refers to premiums (or contributions) receivable less any reinsurance premiums (or retakaful contributions) ceded
3 New Business Premiums (or Contributions)	Refers to the entire single premium (or contribution) in respect of single premium (or contribution) contracts including 12 months contract or "annualized" premiums (or contributions) in other cases for new policies (or certificates). Premiums (or contributions) should include extra premiums (or contributions) of sub-standard lives
4 In-Force Premiums (or Contributions) at the end of year	Refers to the sum of annual premiums (or contributions) in-force at the beginning of year and new business annual premiums (or contributions), less annual premiums (or contributions) from terminations, transfers and revivals
